

## Today's The Day.

### CIAP Offsite Access Changes

Offsite access to CIAP will be transitioning to NSW Health Single Sign-On today. This means that NSW Health staff will be able to use their StaffLink ID to access CIAP offsite.

No changes will be made to the way you access CIAP from a NSW Health facility.

This change has been met with a positive response as you will no longer need to generate or maintain a separate CIAP account/password.

Our [FAQ page](#) will help answer questions you or the clinicians who you support may have.

### What is the diagnosis?

This image shows an injury to the tooth characterised by partial or total separation of the periodontal ligament resulting in loosening and displacement of the tooth.

What's the diagnosis?

## Shift

### Shift by The Black Dog Institute

**A new app by doctors in training, for doctors in training.**

NSW Health is supporting the trial of a new app by the Black Dog Institute called *Shift*.

Developed with doctors in training and using the latest evidence, Shift is quick, confidential and is accessible 24/7.

It is designed to build skills in mental health and wellbeing to help you navigate some of the unique challenges that junior doctors face – including the uncertainty caused by COVID-19.

We encourage you to be one of the first to try this new app, which is part of the JMO Wellbeing and Support Plan, and help create supports that work for future doctors in training. [Join the trial now](#)

### Rapid Publishing in the era of COVID-19

Clinician-scientists watched in astonishment at the exponential growth of academic publications in journals this year.

January 2020, PubMed saw a sharp rise in the number of publications related to COVID-19.

What has generated this race to publish?

Are there drawbacks?

### Talley & O'Connor's Clinical Examination Essentials 4e

*Clinical Examination Essentials 4e* provides an introduction to the essential skills

required to successfully pass clinical exams.

### Key features of this text include:

- **Hint Boxes** to assist students and junior doctors in correctly diagnosing patients
- **Question Boxes** to assist identifying presenting symptoms required for an accurate diagnosis
- **EOSCE hints panels** that provide practice OSCE-style scenarios and answers
- **Clinical photographs** that represent real-life clinical signs, which students have to recognize when examining a patient.
