COVID-19 outcomes from Australian emergency departments

This analysis of the Australian experience includes 'variants of concern' and further waves of infection, leading to significant morbidity and mortality.

Take a look at the findings and the data from [Emergency Medicine Australasia](#).

Access provided by CIAP.

What is the diagnosis?

A 65-year-old man presented with painful, erythematous, and purplish plaques on the extensor surfaces of his hands and elbows.

Laboratory examinations showed leukocytosis and thrombocytopenia.

[Find out the answer here](#) from the New England Journal of Medicine.

Access provided by CIAP.

Transcultural mental health centre

Did you know you can access the Transcultural Mental Health Centre through CIAP?

This resource is designed so that health professionals can locate information that will assist in providing effective mental health care for culturally and linguistically diverse patients.

You can find this resource located in the [mental health speciality guide](#).

Access provided by CIAP.

Effect of salt substitution on cardiovascular events and death

Salt substitutes with reduced sodium levels and increased potassium levels have been shown to lower blood pressure, but their effects on cardiovascular and safety outcomes are uncertain.

The New England Journal of Medicine is providing new visual summaries and videos as part of their enhanced learning.

Learn more about substitution with new visuals and videos in the [NEJM](#).

Access provided by CIAP.

Adolescent vaping and lung injury

In September of last year a 15 year old Sydney teen was admitted to ICU with suspected e-cigarette or vaping product use-associated lung injury.

With the rise of teen vaping this clinical record can help diagnose presentations that may arise in the future.

Learn more about the results from the [Medical Journal of Australia](#).

Access provided by CIAP.

COVID-19 restrictions on occupational balance

COVID-19 has seen unprecedented changes to the daily occupational lives of citizens across the globe as a result social and physical restrictions.

Frontline healthcare workers health and wellbeing have been impacted but what of occupational balance?

Find out more about the methods and results in the [Australian Occupational Therapy Journal](#).
